SUMMARY

Backend developer with hands-on experience building production-grade APIs, async task pipelines, and real-time systems using FastAPI, PostgreSQL, Redis, and Celery. AWS Certified (CCP + SAA). Interned at Secura Infraservices handling cloud migration and AI integration. Won SolveIT Hackathon; finalist at iNoCube.

EXPERIENCE

IT Intern — Secura Infraservices Pvt. Ltd.

May 2026 – July 2026 | Kolkata, India

- Cloud Migration: Transitioned legacy server workloads to AWS using S3 and EC2, improving infrastructure efficiency and reducing server costs.
- Dashboard Development: Built a client-facing guard performance dashboard enabling weekly ratings, structured feedback, and issue reporting.
- AI Integration: Integrated an LLM system to automate performance report analysis, converting raw operational data into actionable insights.

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL

Backend: FastAPI, SQLAlchemy, Alembic, Celery, Redis, WebSockets, JWT Auth, REST, GraphQL

Cloud & DevOps: AWS (EC2, RDS, ElastiCache, SES, S3, Lambda), Docker, Docker Compose, Railway

Databases: PostgreSQL, Redis

Frontend / Other: React, Streamlit, VADER NLP, LLM APIs (Anthropic)

PROJECTS

Real-Time Notification Platform | FastAPI · PostgreSQL · Redis · Celery · WebSockets · AWS · Docker

- Built a scalable notification delivery system with multi-channel alerts, real-time WebSocket push, and async Celery workers for background processing.
- Deployed to AWS (EC2 + RDS + ElastiCache + SES); Redis used as both Celery broker and caching layer; full stack containerized with Docker Compose.
- Designed per-notification rate limiting and delivery status tracking with retry logic and per-user audit trails.

MicroATS — Applicant Tracking System | FastAPI · PostgreSQL · SQLAlchemy · JWT · RBAC · Docker

- Built a multi-role ATS with fine-grained RBAC — Admin, Recruiter, and Candidate roles with scoped permissions enforced at every endpoint.
- Implemented full job application lifecycle with JWT auth, token refresh, role-enforcement middleware, and Alembic-managed migrations.

Zentiment — Review Sentiment Analyzer | Python · VADER · NLP · Streamlit

- NLP tool that processes reviews and outputs sentiment scores + dynamic word clouds via VADER; deployed as a Streamlit web app with CSV upload support.

EDUCATION

B.Tech, Computer Science & Engineering (AI/ML Specialization)

Vellore Institute of Technology, Bhopal | Graduation expected 2028

CERTIFICATIONS & ACHIEVEMENTS

- AWS Certified Cloud Practitioner (CLF_C02)
- AWS Certified Solutions Architect — Associate (SAC-03)
- Winner — SolveIT Hackathon: Built and presented a full-stack solution under competition constraints; selected as top team.
- Finalist — iNoCube Hackathon: Shortlisted among top teams from a competitive college-level pool.
